Utility is aimed at designers, animators and game developers. Package 3ds max supports technologies Maya, Digital Intros, Flash, Bryce and Softimage, and has tools for modeling, animation, rendering and compositing, both within a single project and during the calculation of scenes. The 3ds max suite includes an animation module, a rendering module, a compositing module, and a lighting module. They are all closely related. As a result, when the rendering module is used, the rendering and compositing processes run automatically. During rendering and compositing, there is no activity in the Visual Studio environment itself. Visualization in Visual Studio runs in the background.
